Mean 12.049; Variance 7.022; scale 1.716 Statistics:

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

It consists of I contigs for

* which the order is not known; their order in this record is

* arbitrary. In some cases, the exact lengths of the gaps

* between the contigs are also unknown; these gaps are presented

* as runs of N as a convenience only. When sequencing is complete,

* the sequence data presented in this record will be replaced

* by a single finished sequence with the same accession number.

Location/Qualifiers
* as runs of N as a convenience only. When sequencing is complete, the sequence data presented in this record will be replaced *by a single finished sequence with the same accession number.

humquery@sanger.ac.uk Clone requests: clonerequest@sanger.ac.uk

IMPORTANT: This sequence is unfinished and does not necessarily represent the correct sequence. Work on the sequence is in progress and the release of this data is based on the understanding that the sequence may change as work continues. The sequence may be contaminated with foreign sequence from E.coli, yeast, vector, phage etc. Order of segments is not known; 800 n's separate segments. Unfinished: dJilliny Contig_ID: 00411 acc-AL025574

Length: 55440 bp Unfinished: dJilliny Contig_ID: 00133
